APOLLO 2020 Update 4: Advantage/Professional Fixes, Enhancements and Customer reported defects

===

- [AP-11000, 00042389] Geospatial Portal MarkersNames.WebClient.ashx and AnnotationNames.WebClient.ashx being blocked by browser after security compliance
- [AP-11121, 00055981] Portal – hover icons missing from a secured legacy vector service (WMS)
- [AP-11318, ...] Enable download ISO Metadata button
- [AP-11366, ...] Unable to parse GMI metadata
- [AP-11367, ...] Extend the Apollo REST API search with ability to search by item owner
- [AP-11368, ...] Extend the Apollo REST API search with ability to use OR between search fields
- [AP-11376, 00073158] Legend Label not coming for SLD applied
- [AP-11378, ...] Integrate the Spatial Modelling concept into CZS
- [AP-11383, 00074076] Legacy WMS GetFeatureInfo doesn't work
- [AP-11386, ...] Fix authenticode signing problems
- [AP-11389, ...] New raster service creation still references old decoder.txt
- [AP-11390, ...] Update APOLLO Adv/Pro to latest Cycle deliverables 2020 – Update 2
- [AP-11391, 00074579] "The feature you are trying to use is on a network resource that is unavailable" error when installing Data manager 2020 update 3
- [AP-11400, 00074806] WCS 2.0 – reproject to EPSG:4326 returns an empty/black image consisting of one pixel.
- [AP-11419, ...] User crawls a raster dataset. The generated ISO metadata file by Apollo isn't valid according to the schema
- [AP-11421, 00074816] Missing and inconsistent WCS interpolationMethod
- [AP-11427, 00076598] Legacy WMS – Stylename Limitations (Upper case letter & dot)
- [AP-11428, 00076732] New API to reload based on updated user roles
- [AP-11429, 00077085] Missing style name in getcapabilities response when legacy service layer name contains "dot"
- [AP-11431, ...] CSW ISO full profile is missing CharacterSet
- [AP-11437, ...] Remove the ipSecurity from DecodingService in the Configuration Wizard

APOLLO 2020 Update 4: Core Fixes, Enhancements and Customer reported defects

===

- [IW-6934, ...] Add 'Authorization' as default entry in the AccessControlAllowHeaders header.
- [IW-6940, ...] Crash in OGC module after re-running configuration wizard with invalid DB credentials
- [IW-6941, ...] Missing datasets when upgrading from 2018u2 to 2020u3 (SQL Server) due to long file name (>127 characters)
- [IW-6943, ...] ERDAS APOLLO Essentials 2020 Update 3 Windows Installation error
- [IW-6971, ...] Update SDI Components to latest
- [IW-6973, ...] Patch shows company name as {COMPANY_NAME}
- [IW-6974, ...] Digital signatures of Apollo component files are missing
- [IW-6987, ...] Updating SMSDK 16.6.0.2102 -> 16.6.0.2241 broke patching.
